

## **Beware the Environmental Movement, Beware the Environmental Movement: Who's Watching the Watchmen?**

The anti-10 Commandments of America's Stonehenge, the Georgia Guidestones (since blown up and removed), tell us "don't be a cancer on the earth, leave room for nature, leave room for nature." On the contrary, this "conspiracy kook" says beware of the environmental movement. For starters I'm not talking about the low-level useful idiots gluing themselves to airport runways and destroying priceless pieces of art. The *real* environmental movement goes much deeper and is infinitely more nefarious.

The real environmental movement is an offshoot of Darwin's scam science of evolution that teaches us certain racial groups including black people are sub species. This idea gave rise to the concept of a now Godless Mother Nature (remember this point) that lives under the cardinal rule known as survival of the fittest aka Social Darwinism. Essentially it codifies and justifies eliminating countless numbers of human beings since they're less than fit to live. Here it combines with the Malthusian concept of the earth's limited resources not being able to provide for its population (as if God wasn't a good enough designer). The theories justify and complement each other. If this sounds like a lot like a certain Nazi madman of the early twentieth century you would be correct. Adolf Hitler deified nature and justified his racial theories with the likes of Darwin and countless other American and British eugenicists who subscribed to Darwin, et al. (In fact, take the evolution quotes quiz on my web site [www.boxofsunglasses.com](http://www.boxofsunglasses.com) to see how indistinguishable the intellect of Adolf Hitler is from many American eugenicists). It gets "better". The mother of the abortion movement Margaret Sanger was worse than the run of the mill eugenicist. She basically said why bother institutionalizing and otherwise caring for the unfit kill them before they're even born. Her particular target was the black population. It's no wonder she was a favorite of Hitler and the KKK. The abortion movement continues to be key in the population control movement.

Enter stage left the Rockefeller complex and other American industrialists (or what I like to call the gang bankers). They essentially fused these concepts, the racism of Darwin and the lack of earthly resources vis a vis Thomas Malthus and took it up a notch. By founding the current home of the environmental movement at the UN and its various so-called environmental groups it has spread the concept that carbon and carbon dioxide, the building blocks of life, are pollutants. Today we know carbon pollution as global warming global cooling climate change. (The multiple names prove its inherent falsity but let's stay on point). The problem is all humans and the animals they depend on to survive like cattle have a "carbon footprint". And to minimize carbon pollution and "save the planet" a certain number of humans must go. As codified in the anti-10 Commandments this number amounts to approximately 90% of the world's population.

In a nutshell, this genocidal zealotry is what drives the *real* environmental movement. So, it's no surprise when the high priests of the Godless religion (remember Darwinism says there is no God) of Gaia (or Mother Earth) including Al Gore and John Kerry are silent in the face of a real environmental disaster like East Palestine, Ohio or spraying sulfur into the atmosphere. In fact, if one were interested in SAVING the environment one would be ardently opposed to the environmental movement. But that's a story for another day.

For now, Beware the environmental movement, beware the environmental movement...

Here are the Watchmen...The (former) anti-10 Commandments of the Georgia Guidestones, the Brotherhood of Death and its offshoot the UN-dead....in service to their father the lord of the dead...
