

Even for a dedicated “conspiracy kook” like myself it’s almost impossible to keep up with this stuff since the pure evil Barak Obama and his anarchist “friends” lob salvo after salvo at the rapidly sinking ship that is the “Late Great USA”. His latest move is to revive a Nazi like eugenics nightmare comes in the form of his new “science czar” John Holdren. There was already a run on Mr. Holdren’s book “Ecoscience” right after I personally became aware of this guy a few weeks back (July 2009). But I was able to pull another book out of my own archives entitled “The Population Bomb” (yes the same “Population Bomb” I referred to on the new age page) by his “Ecoscience” co-author, “Doctor” Paul Ehrlich.

Mr. Ehrlich lets us know right away where he stands as he asks, on the front cover, “Population Control or Race to Oblivion?” Why that sounds just like the movie “Watchmen”. The guy from “Pyramid International” and the “Blue Man” with the dot inside a circle (symbol of Osiris) decided that it was okay for a few hundred million in the “imbecile majority” to be sacrificed to well avoid the “Race to Oblivion” (see relevant news stories page, March 9, 2009). Let’s now go to the back cover of “The Population Bomb” where Mr. Ehrlich is described as a specialist in “population biology”:

Mankind’s Inalienable Rights

1. The right to eat well.
2. The right to drink pure water.
3. The right to breathe clean air.
4. The right to decent, uncrowded shelter.
5. The right to enjoy natural beauty.
6. The right to avoid regimentation.
7. The right to avoid pesticide poisoning
8. The right to freedom from thermonuclear war.
9. The right to limit families.
10. The right to educate our children.
11. The right to have grandchildren.

This guy is certifiably insane; we need some Stanford PhD “population biology” wizard to tell us we have “the right to eat well”? Never mind that his wild predictions about mankind dying from mass starvation in the seventies are laughable just like the global cooling/global warming/climate change nut-jobs, any rational person can deduce the man’s insanity right away just by reading this list. For example, look at number 8, how does one enforce this? Do we tell “the religion of peace” our citizens have the right not to be nuked back to the Stone Age just because they won’t worship Allah? Would the 19 Saudi nationals of September 11th have adhered to this “right”? Would the Soldiers of Allah who have training camps all over the “Late Great USA” be beholden to this “right”? Or how about the thousands of Other than Mexicans (OTMs) who have waltzed across the wide-open Mexican border *since* the beginning of Georgie Junior’s “War on Terror”? This guy was co-author to “Ecoscience” with Obama’s current “science czar” John Holdren. Therefore, maybe we can bring this up and get patriots like the Minutemen off the “terror watch list” since by helping to stop the OTMs they are enforcing (friend of “science czar” John Holdren’s) Paul Ehrlich’s right number 8?

Or how about trying to reconcile number 6 with number 9? How do tell someone they have the right to “avoid regimentation” but tell someone else they have the “right to limit families”? The only way 9 can work is to have a policy like say Red China where mothers are arrested, forced in to forced abortions or sterilized for daring to have more than one child? But this sounds “regimented” to me. And how does one get “the right to have grandchildren” if someone else has “the right to limit families”?

But to be fair I perused the book by the colleague of our current “science czar” and we have these pleasant thoughts:

One might think that American scientists, especially biologists, would be using their influence to get the government moving...The establishment in American biology consists primarily of death controllers: those interested in intervening in population processes only by lowering death rates.

Remember this is the exact mentality of our current “science czar” as spelled out in “Ecoscience”...and Obama’s Health Scare umm Care Plan. So be prepared to help quell the “Population Bomb” by reversing the trend of “lowering death rates” you “elderly” Americans as our “Messiah” stretches “our limited resources” to “make sure all are covered”. By the way I hope Uncle Sam does a better job of defining “elderly” when it comes to this literal life and death decision than it does say in defining “rich” when it comes to “just” money.

And recall that (half-white) Barak Obama has outdone even uber racist Adolf Hitler inspiration Margret Sanger with his vote *against* something called the “Born Alive Infant Abortion Protection Act”. And of course one of our Communist in Chief’s first acts as “President” was to lift the ban of US funding of Sanger’s International Planned Parenthood, the international equivalent of the American Birth Control League later known as Planned Parenthood. So not only do Obama and friends want to solve “lowering death rates” he voted that some self sufficient babies need to die as well (if this sounds like “murder” you’d probably be correct). Of course one can see this mentality with friend of the new “science czar” John Holdren “population biologist” Doctor (of death) Paul Ehrlich:

They (biologists) must point out the biological absurdity of equating a zygote (the cell created by joining the sperm and the egg) or fetus (unborn child) with a human being (2)

Umm I’ve already established that this mentality is now combined with someone who voted *against* something called “The Born Alive Infant Abortion Protection Act” in the form of Barak Obama. I don’t really need to say anymore, do I?

Don’t worry middle-aged people, “science czar” John Holdren’s buddy has something in store for you too:

So the first task is population control at home. How do we go about it? Many of my colleagues feel that some sort of compulsory birth regulation would be necessary to achieve such control. One plan often mentioned involves the addition of temporary sterilants to water supplies or staple food. Doses of the antidote would be carefully rationed by the government to produce the desired population size. (3)

And who would enforce this kind of action? Why the “Department of Population and Environment”. But then who would enforce Ehrlich’s “right” number 2, “the right to drink pure water”? And of course we’re relying on the same bunch that told the “imbecile majority” 100 years ago the income tax would never exceed 10% even for the “rich” and 40 years ago the cost of Medicare would never exceed \$4 billion (it’s now literally 100 times that) to “carefully ration” this brainstorm. Ummm....

And here’s John Holdren’s and Paul Ehrlich’s idea of an *international* “Department of Population and Environment”:

Toward a Planetary Regime

“Perhaps those agencies, combined with UNEP and the United Nations population agencies, might eventually be developed into a Planetary Regime—sort of an international superagency for population, resources, and environment. Such a comprehensive Planetary Regime could control the development, administration, conservation, and distribution of all natural resources, renewable or nonrenewable, at least insofar as international implications exist. Thus the Regime could have the power to control pollution not only in the atmosphere and oceans, but also in such freshwater bodies as rivers and lakes that cross international boundaries or that discharge into the oceans. The Regime might also be a logical central agency for regulating all international trade, perhaps including assistance from DCs to LDCs, and including all food on the international market.”

“The Planetary Regime might be given responsibility for determining the optimum population for the world and for each region and for arbitrating various countries’ shares within their regional limits. Control of population size might remain the responsibility of each government, but the Regime would have some power to enforce the agreed limits.” (4)

Here's an excellent summary of what's really going on so you can see that yours truly isn't the only "conspiracy kook" trying to shout from the housetops. Elitist David Rockefeller's fingerprints are all over this whole sham as "useful idiots" like John Holdren, Paul Ehrlich, the eco wacko Sierra Club minions and the rest of the UN-dead zombified jerk-offs run interference:

The fact that the chief scientific advisor to the President of the United States, a man with his finger on the pulse of environmental policy, once openly advocated the mass sterilization of the U.S. public through the food and water supply, along with the plethora of other disgusting proposals highlighted in *Ecoscience*, is a frightening prospect that wouldn't be out of place in some kind of futuristic sci-fi horror movie, and a startling indictment of the true source of what manifests itself today as the elitist controlled top-down environmental movement. (5)

So once again my friends we see the Orwellian genocidal nightmare of the kook radical left eco wacko fringe married with the "advice" of treasonous gang banker Marxist/Socialist/Godless capitalist (and David Rockefeller puppy dog) Zbigniew Brzezinski under the façade that is Barak Obama (Need I say it? WATCH OUT FOR THIS GUY).

So the Rockefeller funded Nazis were never really defeated, were they? Worse yet, "THEY" now run "The Late Great USA".
