

Goddess Earth

Author Samantha Smith's excellent book entitled "Goddess Earth" 'bridges the gap' between the "New" Age Mother Earth Gaia weirdoes and the so-called 'science' of the eco wackos. Eco wacko high-priest/hypocrite Al Gore shows up, once again, right in the middle.

Here is her listing of the goals of something called "Globescope Pacific Conference". It occurred on Halloween, 1989 in Loony umm Los Angeles, California and was run by groups associated with the UN-dead so we can see where this is going already (comments in parentheses are mine):

-Earth Day 1990

-International Population Control (One way of achieving this would be the UN-dead associated International Planned Parenthood. Ho-hum what a shock the UN-dead would be interested in another forum to spread its genocidal depopulation agenda)

-Re-establishment of a youth conservation corps ("Progressive" Bill Clinton gave us "Americorps" a few years later and now "Progressive" Obama wants a civilian national security force "as powerful as the military")

-Environmental education curriculum and sex education in all educational systems (This way nobody has time to learn about the Constitution or math and chemistry to solve *legitimate* environmental problems like say water pollution caused by excessive corn growth to 'solve' global warming/climate change.)

-Conflict resolution taught in schools (More time wasting; see above)

-Elimination of the Electoral College (a favorite of "Progressive" Hillary Clinton; what it's doing in a conference about "Mother Earth" is anyone's guess)

-A nature rights amendment to the U.S. Constitution (Uncle Barry's "Science" czar John Holdren considers "Progressive" Margaret Sanger's solution to "the negro problem" that heavily targets inner cities today, 2009 or abortion for short a Constitutional right. This is right in line with International Population Control noted above)

-More power to the United Nations (what's new...boring)

-Eliminating international debt (surely by taking from the "haves" in the "Late Great USA" and giving to the "have nots" while these "useful idiots" nay say a word about the Rockefeller criminal gang banker hand that feeds them)

-Providing global health insurance (Maybe Uncle Barry's "free" government health care is only a start)

-Having interfaith worship (This should be good for skills like "Christian leader" Rick Warren who would have lick Obama's boots and negotiate with "the religion of peace" where "peace" is achieved when people decide to keep their heads on their shoulders by not criticizing Allah)

-A United Nations' sponsored Environmental Sabbath for Goddess Earth (Maybe they can worship at Lucifer's Trust with the "Ascended Master" Djwhal Khul")

-Earthkeeping seals of approval on products (Maybe GE will head the charge...after they're done feeding us more global warming/climate change "science" through their brain dead lap dog skills on their subservient NBC network)

-Conversion of military funding to sustainable funding

-National energy policies

-Global food security (How do you achieve this when farmland is being devoted to corn for ethanol to solve global warming/climate change?)

-Developing world citizenship (Now a goal of the "globalists")

This list could essentially serve as Uncle Barry Obama's teleprompter talking points even though it was written almost 20 years ago.

Nonetheless, just a few "fun facts" on this conference are worth noting:

1. The attendees included a who's who of today's eco wacko hypocrite elites including Al Gore, Jimmy Carter, Tim Wirth, Ted Turner, Canadian oil billionaire Maurice Strong and ex-"Presidential" candidate Gary Hart. At least three that I know of Al "carbon credits" Gore, Tim Wirth and Maurice Strong have spoken at the Church of the eco wackos, Satan umm Saint John's the Divine, MYSTERY, BABYLON, USA.
2. In addition to these hypocrite, ultra-rich, genocidal eco wacko elites another attendee was someone named "Little Crow, founder of the American Indian Unity Church, invoked spirits of the dead to aid the conference. He lit incense and sage (to "remove negativity and insensitivity") and prayed to Mother Earth, Grandfather Spirit, and the Four directions".
3. The Conference was sponsored by Global Tomorrow Commission that was working with something called the World Commission on Environment and Development, established by TA DA...the UN-dead.

4. Additional funding announced at this conference for a ten part series on Public Broadcasting System (PBS) called "The Race to Save the Planet" and various other environmental educational causes was donated by Walter Annenberg.

Wait a second...that's the same "Annenberg" of the "Annenberg Challenge". The Chicago chapter was founded by bombthrower/cop killer William Ayers. And its first chairman of the Board? Why "the community organizer" Barry Sotero if that was his name then or Barak Obama today, 2009.

Huh. No wonder "Globescope" sounds just like Barry Sotero-Hussein-Obama' talking points...
